

As presented at International Symposium of Earthworm Ecology (ISEE)VII, Cardiff 2002; at ISEE8, Poland Sept. 2006; International Oligochaete Taxonomy Meeting IOTM1, Madrid 2004 and IOTM5, Switzerland April 2011.

Recommended text for ISO/DIS 23611 Soil quality - Sampling of soil invertebrates.

COSMOPOLITAN EARTHWORMS
– an Eco-Taxonomic Guide to the Peregrine Species of the World
4th Edition (2010)

by
Robert J. Blakemore PhD

“Essential tool for ecological study of the soil fauna, anywhere.”

The Biology, Ecology and Identification of the 150+ most Common Exotic Species found around the World – **not just the easy ones** – including the Vermicomposting Species (e.g. *Eisenia fetida / andrei*, *Perionyx excavatus*, *Eudrilus eugeniae*, *Lampito mauritii*, the dichogastrids, *Dendrobaena / Dendrodriulus* and *Pheretima spp.*, etc.).

All 20 world Families of Earthworms (Annelida : Oligochaeta) – a.k.a. angleworms, dilong földigiliszta, lombris, mimizu, minhocas, night crawlers, oligochaetes, oligochètes, oligoqueto, regenwurmer, vers de terre – are reviewed and links to some of their DNA barcodes are provided as additional phylogenetic and ID support.

Language: English. Computer CD guide. Pages 850+ ~350 Figs. and Internet links. Format – Windows 95/98/ME/NT/2000/XP or 7 with MSWord + .jpg graphics.

Cost:

Institutional, per copy

AUSS\$100.00

COSMOPOLITAN EARTHWORMS CD
TABLE OF CONTENTS

	PAGES
Dedications & Acknowledgements	i
Preface to Editions	iv
1. GENERAL INTRODUCTION	
Background	3
Characters and origins of peregrine species	12
Translocation and export of natives (e.g. from Australia)	14
2. BIOLOGY AND ECOLOGY	
Origins	17
Earthworm biology, morphology and reproduction	20
Hybridization	21
Biometry, Size range	22
Longevity	26
Regeneration	26
Predators, parasites, pathogens & symbionts	28
Population abundance & diversity	31
Table 1. Reports of diversity & abundance (e.g. in various habitats of Australia).	
Biodiversity resources and regional distributions	36
Rates of spread of introduced earthworms	46
Ecological strategies	48
Behavioural trials	52
Temperature and moisture tolerances	53
Effects on soil processes	54
Introduction	
Nutrient cycling	
Water relationships	
Soil structure	
Worm casts	
Burrows & roots	
Root mats and organic matter	
Mesofauna & Microorganisms	
Plant growth factors	
4. AGRONOMIC POTENTIAL OF EARTHWORMS	65
Effects on plant production	
Table 2. Summary of pot experiments of earthworm effects on plant yields.	
Table 3. Summary of field experiments of earthworm effects on plant yields.	
Programs to introduce earthworms	
Conclusions on building healthy soils	
4. NUTRITIONAL AND MEDICINAL USES	77
5. ECO-TAXONOMY	79
Introduction	
Collection	
Inspection	
Anatomical characters used in taxonomy	
Identification – Taxonomic classification and nomenclature	94
Problem of parthenogenetic polymorphism	
Systematics (Linnaean / Binomial taxonomy vs. Cladistics)	

Family Classification/Origins/Distributions/Taxonomists	105
6. GUIDE TO THE SPECIES	121
Introductory Keys to the Revised Families of Earthworms	125
Approximate Totals for Species /Genera of the Families	130
Family Enchytraeidae	131
Family Moniligastridae (e.g. <i>Drawida barwelli</i>).....	132
Family Ocnerodrilidae. (e.g. <i>Ocnerodrilus occidentalis</i>).....	166
Family Acanthodrilidae (e.g. <i>Microscolex phosphoreus</i>).....	189
Family Octochaetidae (e.g. <i>Dichogaster bolau</i>).....	214
Family Megascolecidae (e.g. <i>Perionyx excavatus</i>).....	249
Table 4. Key characters to <i>Pheretima</i> -group genera.	
Keys to common peregrine pheretimoids	295
Comments on misidentification of <i>Pheretima browni</i> Stephenson, 1912	302
Genus <i>Amyntas</i>	303
Possible synonyms of <i>Perichaeta barbadensis</i> Beddard, 1892	315
Genus <i>Metaphire</i>	396
<i>Metaphire hilgendorfi</i> / <i>Amyntas tokioensis</i> spp-complex	408
Genus <i>Pheretima s. stricto</i>	473
Genus <i>Polypheretima</i>	498
Family Glossoscolecidae (e.g. <i>Pontoscolex corethrurus</i>).....	513
Family Eudrilidae (e.g. <i>Eudrilus eugeniae</i>).....	525
Family Almididae (e.g. <i>Glyphidrilus papillatus</i>).....	532
Family Criodrilidae (e.g. <i>Criodrilus lacuum</i>).....	537
Family Sparganophilidae (e.g. <i>Sparganophilus tamesis</i>).....	546
Family Lumbricidae (e.g. <i>Lumbricus terrestris</i>).....	552
Keys to peregrine lumbricid genera/species	
Table 5. Common lumbricid genera. Tables 6 & 7. <i>A. caliginosa</i> species-complex.	
Genus et species dubiae Lumbricidarum	728
7. APPENDICES and REFERENCES	729
Glossary	
Conventions (Taxonomic and Earthworm Identifications)	
Abbreviations	
References / BIBLIOGRAPHY	757-827
Appendices	828
Table 8. Non-endemic earthworms from various regions of the world.	Dec., 2010
